## Self-Owned Overseas Warehouses

### Fleetan has overseas warehouses in Riyadh, Jeddah, and Dubai.

The overseas warehouse in Riyadh has an area of 3400 square meters, a floor height of 8 meters, and can accommodate 500+ standard pallets. At the same time, there are 3000+ storage units for fulfillment. **The distance from Fleetan WH to Amazon RUH3 is only 1km.** The goods in our warehouse can be delivered to Amazon WH quickly according to the instruction of the sellers.

In addition, Fleetan can also provide sellers with fulfillment services such as **FBA replenishment, one-piece drop-shipping, RTO receive, and label exchange.**

## Localization - team localization

Adhere to the localization of the team, reduce operating costs while providing local employment opportunities, and effectively improve operating efficiency **through the division of labor and cooperation between Chinese employees and local employees in the Middle East.**

## Compliance - warehouse compliance certification/legal employment

Fleetan's self-operated warehouses have received compliance certifications from local governments in the Middle East (business licenses, fire certificates, civil defense safety certificates, etc.).

At the same time, Fleetan employs legal workers in strict accordance with policies, **rejects irregular warehouses and labor, and achieves lasting results through compliance.** operations while ensuring the safety of customers' goods.

## warehouse services

Fleetan can provide a full range of warehouse services according to customer needs.

### warehousing

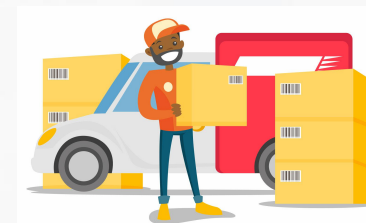

### Dropshipping

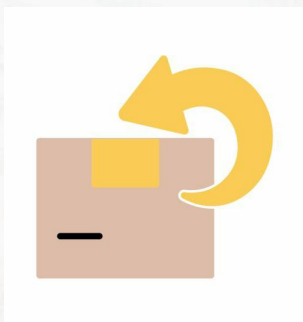

### Product sorting

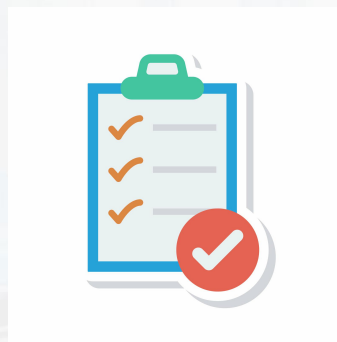

### Deliver again

### ERPsystem

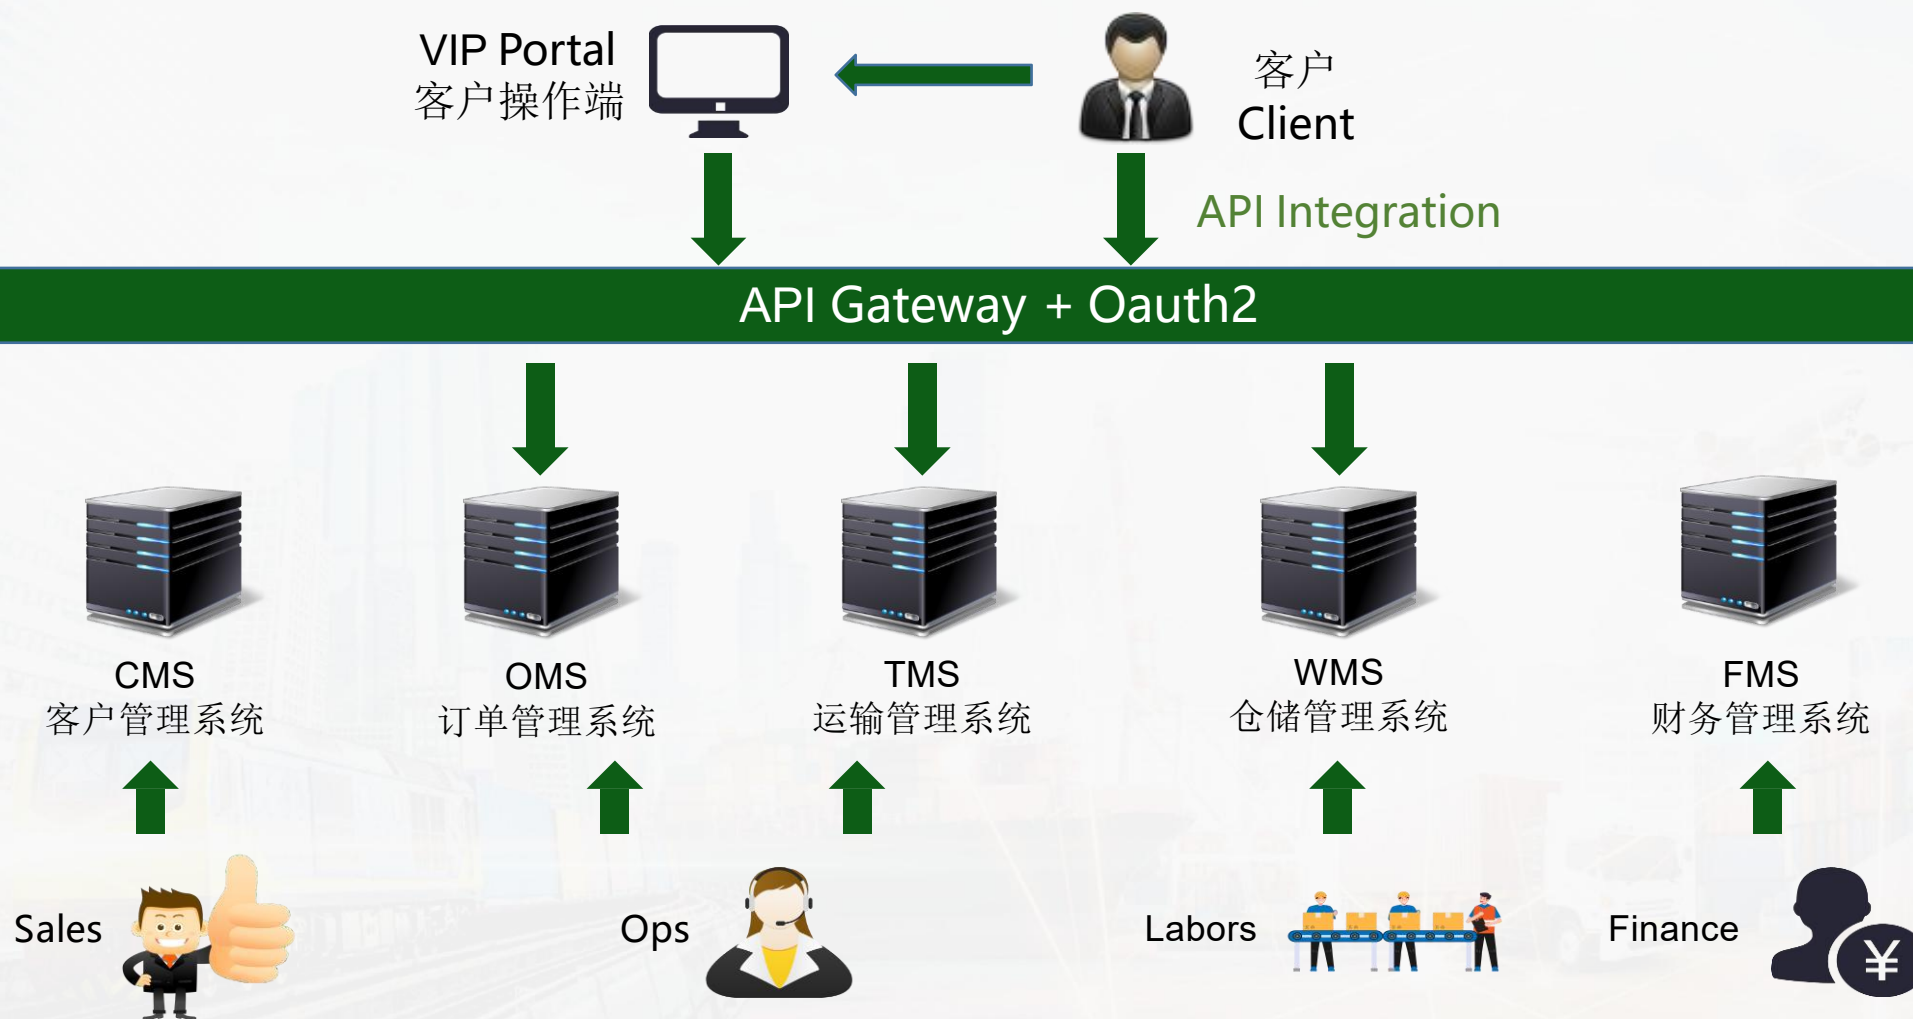

## Technology Driven

**Fleetan** is a technology-driven company, which had IT genes since its inception. Our technical team members are all from China's Internet giants. In our daily work, **digitizing the full link of operations is our long-term goal.**

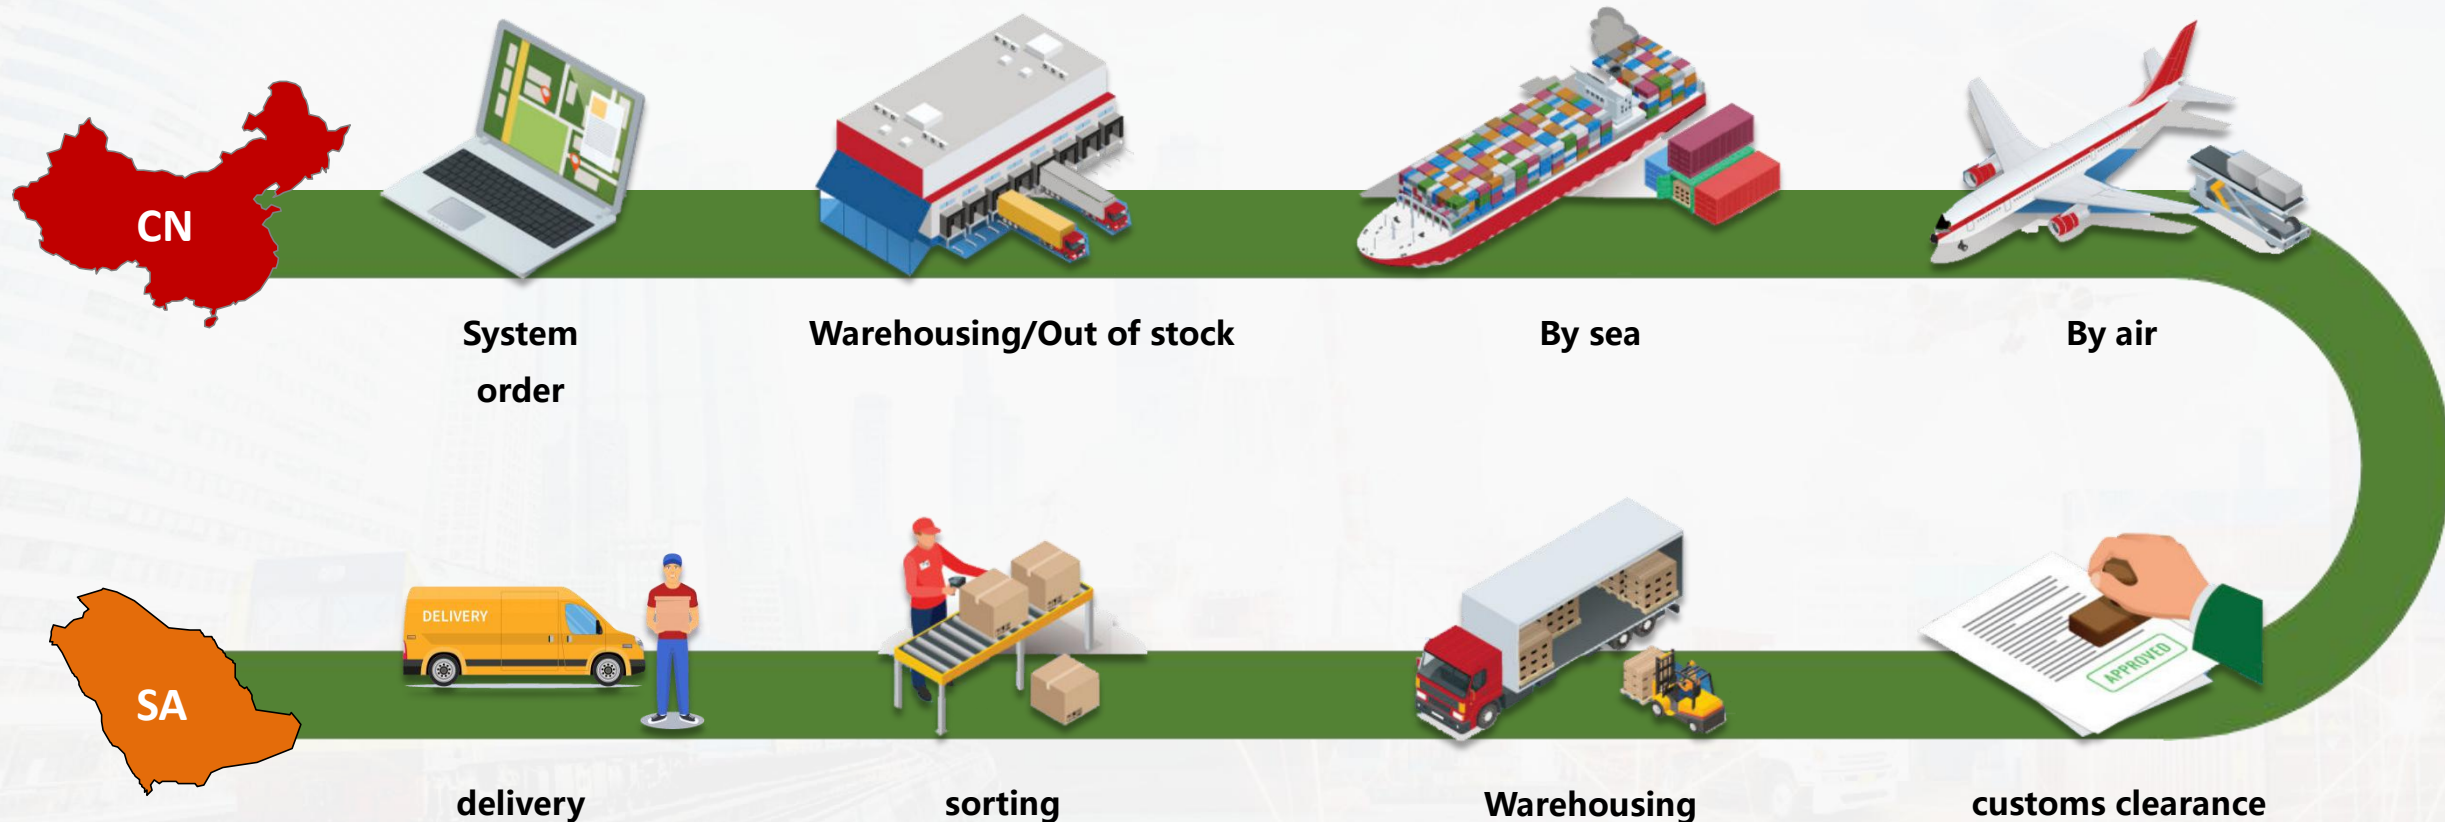

## System Diagram

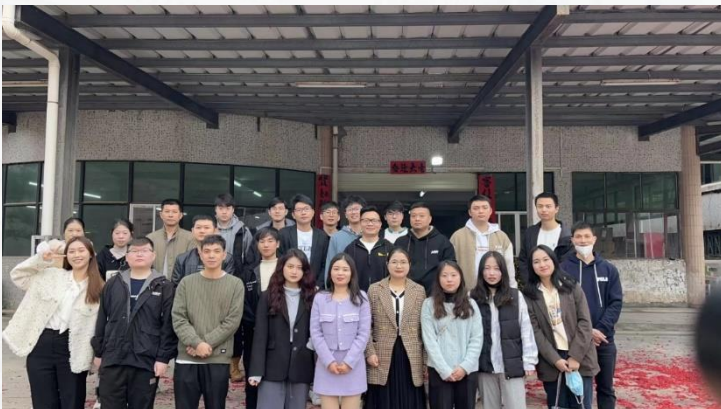

# How to ship goods from China to Saudi Arabia?

Through real-time tracking through the digital system, the logistics trajectory is clearly understood, and every link is well-documented, effectively avoiding the problem of lost items and ensuring the safety of goods.
